Report Generated: Jun 29, 2003 2:50:55 PM

Notes: **example SIM**

The PIN code for this SIM card is: **Disabled**

Section 1. Identification

The section lists data stored on this SIM card which identifies it to a particular country and GSM network provider.

Network Provider:	One2One	<i>The name of the network provider who issued and owns this SIM card.</i>
Country:	UK	<i>The country where the network provider operates.</i>
IMSI:	234307174181437	<i>Every mobile subscriber in the world has a unique "IMSI" (International Mobile Subscriber Identity). Although this number is not a telephone number, it is directly related to it. Contact the network provider to obtain the telephone number if required, quoting this IMSI number.</i>
ICC ID:	N/A	<i>Many SIM cards also store a manufacturer's serial number for the card itself, called "ICC Identification", or "ICC ID" for short.</i>

Section 2. Stored Telephone Numbers

The section lists all of the names and telephone numbers which the subscriber has stored on this SIM card.

Name	Telephone Number
GARAGE	01999511777 (UK)
BISTRO	01999681199 (UK)
BUILDER	01999682966 (UK)
PLUMBER	0199972674 (UK)
DENTIST	0199987800 (UK)

Notes:

1. *The order displayed is not alphabetic. It is the actual order the numbers are stored on this SIM card, which is usually the order the numbers were first entered. Numbers at the top of the list may indicate persons close to the subscriber, important numbers, or numbers that were to be called frequently.*
2. *Some mobiles are capable of storing numbers in the mobile memory as well, so the above list may not be a complete list of contacts.*
3. *It is possible for people to retain their numbers as they move to different locations (number portability). Given this, location information shown is only for guidance purposes.*
4. *This SIM is able to store up to 200 numbers. Currently 5 numbers are stored.*

Section 3. Stored Text Messages

The section lists all of the text messages stored on this SIM card. These messages have either been sent or received by the subscriber, or in some cases, are still to be sent. All messages are marked accordingly:

There are no text messages stored on this SIM card.

Section 4. Deleted Text Messages

The section lists all text messages once stored on this SIM card, but now deleted, provided that the messages can be recovered.

There are no deleted text messages on this SIM card that can be recovered.

Section 5. Last Telephone Numbers Dialed

The section lists recent telephone numbers dialed by the subscriber.

There is no dialed telephone number history stored on this SIM card.

Notes:

- 1. Although many SIM cards are capable of storing this kind of information, a number of mobile phones elect to store last dialed numbers in the phone memory instead.*

Section 6. Last Location Used

The section details in which country and on which GSM network this SIM card was last used.

Last country used in:	UK
Network provider used:	One2One
Location area information:	314

Notes:

- 1. The location area information can help identify whereabouts in the country this SIM card was used. Contact the network provider shown to obtain this information.*
- 2. SIM cards do not store information relating to when they are last used.*
